SPRING 1905

The Sarcoxie Nurseries

JAS. B. WILD

SARCOXIE & BROS. MISSOURI

BEST COLD STORAGE AND PACKING HOUSE EXTANT.

WHOLESALE AND RETAIL PRICE LIST

Issued September 20, 1904

...Western Grown Nursery Stock...

Ornamental Trees for City and Private Parks

Our Nurseries are advantageously located on the line of the St. Louis & San Francisco R. R. (Frisco System), between diverging points. Three passenger trains daily each way. It is but ten minutes walk from depot to our grounds. Shipping and business facilities unsurpassed. Side track adjoining grounds. Connected by mineral belt and local telephone companies; Missouri, Kansas & Texas long distance phone in our office.

PRESS OF PRACTICAL FRUIT GROWER. SPRINGFIELD, MO

SPECIAL MENTION—COOL STORAGE WINTER SHIPMENTS.

The past years have demonstrated the necessity of winter storing young nursery stock and plants, and we now have with our COOL STORAGE PROCESS, the best method of keeping and wintering trees and plants for shipment at any time, likewise extending planting and shipping into the month of May.

FOR WINTER AND SPRING ORDERS, our storage room (see above cut), having a capacity of over twenty carloads, will be supplied with an assortment of leading Fruit Trees, Forest Tree Seedlings, Grape Vines, etc., which will enable us to ship to our Texas, Pacific or Western and other distant customers as early as they may desire.

All orders requiring storing for Early Winter or Late Spring shipment must be sent in by December 20th. Customers can order any time between October and April 25th, and shipments can be made without danger to any point south of the fortieth parallel in winter (except January) from our storage house, of such stock as we have in storage.

A LIST OF STOCK IN STORAGE WILL BE SENT TO APPLICANTS AFTER DECEMBER 20th OF EACH YEAR.

We clip the following from the editorial correspondence in the *Prairie Farmer* (Orange Judd, editor), Chicago, June 26th, 1886, relative to the reports on exhibits at the eleventh annual meeting of the Nurseymen, Seedsmen and Florists, held at Washington, D. C., June 16th to 20th, 1886: "J. B. Wild & Bros., Sarcoxie, Mo., exhibited a lot of trees and plants kept in cool storage up to June 10th, having been placed there November last, without moss, sand or soil, and trees being corded up in fine condition, the plan making it possible to extend shipping season much longer than usual."

Modes of Propagation in Apple Trees

We propagate our trees from our regular Cion Orchards (mother blocks), and not from nursery rows, except in newly introduced novelties and scarce sorts, which are necessarily propagated from young trees until top worked trees can come into bearing. See page young trees until top worked trees can come into bearing. We are the largest growers of Apple Cions, being headquarters for the nursery trade.

We are sometimes asked whether this or that method of propagation is best. The major part of our Apple Trees, as in other leading nurseries, are grafted on the best AMERICAN or French-Apple Seedlings obtainable, making two or three grafts from a stock or seedling, and we do not call them whole-root grafts. Years ago when there was a great claim made for the so-called whole-root (?) grafts, we ordered some of these so-called whole-root grafts from a Missouri nursery claiming to make a specialty of the so-called whole-root grafts and trees. Fig. 3 is from a photo of what we received as whole-root grafts. Also in this order were several varieties of two-year-old apple trees sent in as whole-root trees, but neither grafts nor trees were found to be such, although billed and labeled as such. Since Fig. 3 represents an average of the kind of grafts that the so-called whole-root grafted trees are grown from, is it to be wondered at that the purchaser not familiar cannot discover a difference except in price (which is about the only difference)? What we believe should be sent out as whole-root grafts, or from which the nearest truly whole-root trees can be grown, is from grafts like our Fig. 4, which is worked on the ENTIRE STOCK, (not as in Fig. 3). We do not, however, claim any advantage for whole stock grafts, as represented in Fig. 4. In fact, this kind of graft offers many serious objections, since the stocks or seedlings are subject to great variations as to hardiness, as a rule not being as hardy as the leading commercial varieties, and in planting places the tree upon the greater part of the seedling, which will not stand the cold climate of some sections. Then there is the objection of sprouting from the ground, rendering the susceptibility of being affected by Woolly Aphis much more than in any of the other methods. THIS ALSO APPLIES TO BUDDED APPLE TREES, EVEN TO A GREATER EXTENT, as also in the uneven keeping quality of the fruit, which is not so apparent on trees more nearly on their own root system, thereby rendering the keeping quality more uniform. Observation shows that most planters as well as some nurserymen, cut off or shorten in this kind of graft before planting to about where the lower tie appears, making these grafts practically the same as in Fig. 5, which are called crown or collar grafts, and places the crown some four or five inches below where it originally stood. Fig. 11, worked on second cut of a stock, more nearly conforms to placing the root, when planted in the ground, in its natural or former position than any other method, and also does away with most of the sprouting eyes, and is, in our opinion, the best kind of a graft obtainable from a seedling or stock. Fig. 6 represents piece-root grafts as generally made and sold as such.

President Wellhouse gave his experience as follows: "In 1876 we planted out about 30,000 grafts and some 4,000 or 5,000 of whole roots. We had heard a great deal about these whole roots, so we planted about 5,000. We ran a deep furrow and put the lister in and made the furrow just as deep as we could get it, and when we planted the whole roots we had to take a spade and dig down still further. We took them all up at two years old and planted about 30,000, which were from piece roots of the usual length—two inches. In the orchard there were two rows of Missouri Pippins and two rows of Ben Davis on whole roots, planted in the spring of 1878, and growing there now. If any man can tell the difference, he can do more than I can. The only difference I saw in that time was that the whole roots sent up more seedling sprouts and caused us lots of work, but so far as the longevity of the trees was concerned, we could see no difference. But they were terrible things to sprout. About nine-tenths of our two-inch roots, when we took them up

from the nursery, had sent out roots from the scion, and the more we experimented in that line the more we desired them that way; and from that time on we have used only short roots, to get the roots from the scion, and have always been satisfied with them. Whenever you pay one mill more for a whole root than a piece root you are out just that much money."

Prof. W. L. Howard, of the Missouri State Agricultural College, says, on the subject of whole and piece roots: "Experiments conducted by the government fruit stations, after experience with four years' growth, conclude there is no difference in the growth and vitality of a tree, whether grown from whole or piece root graft, and that whether nursery stock is called whole root or piece root."

Budded Trees Expose Equally the Defect

The oily-tongued tree agent, with his rubber tired rig, carrying some three or four grafted trees, to show to his would be customers, who imputently asks you to dig up your orchard and plant his budded trees, is still plying his game, first in one state, then another. He carries no circulars or catalogue, (this alone ought to cause an inquiry.) He invariably selects specimens that are poor (if not grafted purposely) and shows them to effect his sale of budded trees. Here is the defect. If he would equally show the more injurious defect of budded trees (see half tone in upper left hand corner) he would not dupe the purchaser, for it would be apparent to any intelligent tree planter that a defect whether above ground or below is a defect, nevertheless, and as one of the best orchardists in Lawrence county, Mo., puts it, that he prefers whatever defect there must necessarily be in all methods of propagation that it be under the ground and NOT AT THE TOP OF THE GROUND, as must be in budded apple trees.

Just take one of their budded trees, and cut out a section as in the illustration, and you will find THE DEFECT EXPOSED to your entire satisfaction and the other fellow's discomfort. Most nurserymen carry a portion of their varieties in apple either in budded or grafted trees, as the case may be, and if you will write them

you can get a list of varieties of either method of propagation, and they will not cost 35 cents to 50 cents either, but will be furnished at the listed prices which are generally one-fourth of the price these fellows ask. Try it; expose the defect.

Now, if the whole root graft is the bogn of a long-lived fruit tree, why cut off any part of the root? Strange, is it not, that the advocates of whole root grafted trees do not also dwell on whole root grafted roses, quinces, grapes, plums and other fruits that they, like others, are growing from cuttings or piece root grafts.

Give this matter your unprejudiced research and you will ultimately come to the conclusion, as Prof. T. V. Munson puts it: "That process which in the shortest time puts the tree upon its own roots in a healthy condition is the best." That rule naturally follows from the law of vegetable growth that all the other parts of a tree or plant depends upon its own leaves for sustenance, and takes on gradually characteristics in harmony with the life process of the leaf. Hence the cutting, when it will root of itself, is the most natural way of reproduction, next to that from the seed itself. But if the scion will not grow as a cutting itself, then a foster root must be supplied to sustain the cutting until it forms roots of its own. This is most perfectly done with a short piece of healthy root comparatively free from sprouting eyes, carefully fitted to the lower end of a long scion," and which is now considered the best for uniformity of fruit bearing, as well as keeping qualities.

The Various Habits and Growth of Trees

Upon this we feel necessitated to give some information, especially since there is frequently dissatisfaction expressed by purchasers upon receiving their trees when they are not all of equal size and beauty. The unsightly, crooked and small trees are looked upon as being inferior, and the nurseryman is charged with fraudulent motives for having sent out such trees, while at the same time he may have acted for the benefit of the purchaser and have given him the most costly as well as the most valuable trees—for there might be a large number of handsome, rapid growing varieties, collected for cultivation, which would be the most profitable for nurserymen to cultivate, but would they do for the purchaser? From the fact that such can be grown fit for sale in two or three years and upon clearing off the nursery grounds no refuse trees will be found, while among the crooked growers many will have to be left in the digging on account of being too extremely crooked to send out. And there will be still more among the feeble growers, for many of them are not large enough at even four or five years. The loss on these often reaches 25 per cent left on the grounds to be cleaned up and burned.

The question may here be asked: Why do not nurserymen cultivate only the nice, thrifty growers? Because those planting trees are desirous of getting good fruit, and we must raise those recommended by our leading horticulturists and fruit-growers, also such as our own markets and palates say are good. These recommend certain varieties, of which the crooked and feeble growers are recommended as well as the handsome, irrespective of the habit and growth of the tree, from which the nurseryman is induced to cultivate it, not because he takes delight in sending

Read Terms and Conditions of Sale Before Ordering.

out inferior trees, as they are generally called, to receive the abuse of the people, but as a candid, reflecting man, conscious of his responsibility to the community at large for the dissemination of good fruit, his utmost endeavor—first, to cultivate good fruit, and second, as nice trees as those fruits can be made to grow—not only such as will dazzle the eye in size and beauty but such as have all the good qualities of which the leading characteristics are flavor and productiveness, in short, most profitable, which, as he well knows, not only benefits his fellow man, but greatly involves his own personal welfare in after time, as it requires more than mere raising of showy trees to preserve or establish a nurseryman's reputation. However, the free and rapid growing of a variety (when accompanied with good fruit) is an important consideration in favor of its extensive cultivation.

Advertisement

Our nurseries are situated on the western slope of the Ozark mountain range, at an elevation of over 1,150 feet above the sea (about 800 feet above St. Louis), adjoining open prairie lands. These conditions, together with the character of soil, will at once convey the superior advantages we hold for growing nursery stock of the best quality, and maturing same in advance of the more Northern and Southern states.

Having handled some of the products of a number of the leading nurseries East, North and South, the past few seasons, we are convinced that we have better matured stock here by October 10th than many nurseries can claim for same time. The conditions confronting us have brought about the necessity of growing a more complete line of stock, and which we now claim to have, thus assuring our patrons of as good quality, well matured, and as complete in assortment as can be found in any one nursery.

To Our Friends and Patrons

We sincerely thank all our customers and friends who have so generously patronized us in this and former years, for your kind favors. We appreciate them, we assure you, and shall always strive to make your dealings with us both pleasant and profitable.

We hope to hear from all our old customers and friends during the coming season, and from as many new ones as we can make it an object through OUR PRICES AND MANNER OF DEALING DIRECT WITH THEM, to kindly favor us with their orders.

We give our attention wholly to the Nursery business—no other interests conflicting. Aided with twenty-nine years' experience in the most approved methods of growing and handling nursery products, customers can rely on receiving the benefit of our large experience. We confidently ask the attention of our patrons to our stock, and trust when possible they will look through it and see what we have. Our grounds are open and free to all visitors, except Sunday.

THE GREATEST CARE being taken not to send out anything that is not true to name, holding ourselves ready to replace or refund upon proof, equal to the amount of first cost of trees, etc., that prove untrue, but to no greater amount.

REFERENCES.—That we are in actual and permanent business, we deem it only fair to place the information regarding the responsibility of the firm with whom you entrust your orders and commands:

REFER TO Messrs. Theo. Sabert, Cashier State Bank, Sarcouxie; H. B. Boyd, Cashier First National Bank; Reynolds & Son, S. P. Burris, Red Front Mercantile Co., or any business house in Sarcouxie.

To Correspondents

If you have sent us an order with remittance and do not hear from us in a reasonable time, write again. We invariably acknowledge all orders received by postal card or letter, and give an ORDER NUMBER for reference, which you will please preserve.

We answer all correspondence relative to our line of business that is not or cannot be answered in our printed list; but anything about growing or planting, where a reply is wanted, must be so written as to allow us to insert answers.

RECEIPTS.—The receipt of every remittance is promptly acknowledged by us. Each order received is duly numbered, and as the receipts given mention said number, customers preserving their receipts can readily refer to any order sent us by simply giving the number, and we can instantly refer to the original order, which we preserve for a number of years for future reference. We hope each purchaser will save their receipts and when making inquiries concerning any order always give its number, for without it requires time and patience to look it up.

What to Order

While leaving everyone to make his own choice, we advise you not to order too many varieties, whether intended for domestic use or marketing. Select sparingly such varieties as have been favorites in the localities from which you came, es-

pecially if you are remote from there, but rather select such varieties as are suited to the locality you intend to plant in. In doing this you may have to give up some favorite sort, but it will be an easy matter when you see how unprofitable and out of season your favorites generally become.

We desire also to call your attention to those so-called Fruit Unions—that agree to plant orchards for you and claim to know better what you want, and are willing to select for you; your successful neighboring fruit-grower is better able to tell you what to plant than any nurseryman or fruit-grower remote from where you desire to plant.

Execution of Orders

We endeavor to execute all orders promptly and as nearly as possible in rotation as received, giving each order the most scrupulous care and attention to insure reasonable satisfaction. Spring shipping brings with it an unusual amount of items to be looked after, and notwithstanding we have a largely increased force of men, orders are liable to be delayed some days. Then again the mails are sometimes missent, or delays occur on the road that we are not responsible for. Occasionally errors occur in the hundreds and even thousands of details incident to our business, but we are always ready to rectify them on proper proof, but cannot do so unless informed just what the trouble is within the limited time printed on the invoice sheet. When the bill and goods are received, check it up at once; if correct, give proper credit without delay; if not correct, advise us of the fact then and there. See Article II, Terms and Conditions of Sale.

Adjustments are easy while the details are fresh in mind, but we cannot be blamed for looking with suspicion upon complaints made weeks afterward or in refusing to consider them.

Secure Your Selection by Sending Orders Early

If our friends on receiving this catalogue will make a list of the trees and plants they want, and send their orders at once, we can then reserve, until proper shipping season, such stock that may be on hand at time order is received. Orders will be booked by complying with terms and conditions of sale.

Packing and Delivering Season

Which generally commences about October 10, in the fall; for spring, from open ground, about February 10 (often earlier). For California and the South we pack and ship in mild weather from Storage House all winter, and it gives ample time for long shipments. Past experience has demonstrated the fact that nursery stock arrives in best condition when long time is required in transit, if shipped when stock is in most dormant condition—being during the months from November to February.

Care of Trees on Arrival

As soon as you unpack trees, having your trenches previously dug to receive them, set in a slanting position, then fill in around the roots, treading the soil sufficiently to make it firm, and avoid having bunches set side by side, without soil between them. This is a serious drawback attending the growth of trees, as much damage results from having trees "heeled in" with openings, allowing drying or freezing before planting, and the nurseryman is charged with having sent poor stock, when the fault is in mishandling after arrival.

Should trees arrive in a shriveled condition, after a long delay in shipment, take out all shriveled trees, and bury tops and all for about ten days, to restore them. Should trees arrive in a frozen condition place in the cellar, to allow gradual thawing, or bury in soil until thawed out. Do not expose stock to hasten thawing. It is most essential to let frozen stock thaw out gradually in a dark, cool place; therefore avoid exposure to sunlight or heat when transferring to a cool place.

Fall Planting

The Spring planting season is often of such short duration that much intended work is necessarily omitted or postponed. In the fall there is an abundance of time to plan and plant, and the work therefore can frequently be done as satisfactorily as in the Spring.

The once prevalent notion that Fall planting is not advantageous, has proved to be erroneous, and with the exception of a few varieties of evergreens, almost everything called hardy can be planted successfully in the autumn, except in some regions where the winters are extremely severe, or in exposed situations, in which cases Spring planting is absolutely necessary.

Plant as early after the first killing frosts as the trees become thoroughly dormant, thereby avoiding delay until the Spring months. In a climate like this, where the severe cold is often broken, trees planted in November or December will before Spring have formed new roots sufficient to give it a firm start in the ground, and will grow off more rapidly when Spring growth begins. Trees can be planted up till April, but the success is rendered less certain than if planting is done in Fall or early Winter.

No Agencies

We are often asked if we employ agents to sell our trees and plants. In order to avoid much correspondence we here state that we have not since we began business, employed any agents.

Our efforts are directed toward the growing of FRUIT TREES, Forest and Evergreen Trees and Plants, which shall be the best that can be produced. Hence we look to the growing as first importance, and offer our stock to the Wholesale and Retail Trade through our price list direct, our only authorized agent.

We desire the patronage of all fruit-loving people, of men who know the value fruit trees and plants when bought. We want the patronage of careful men who will take care of fruit trees when bought. We want to sell to men who sell again and keep themselves familiar with the best varieties and needs of a planter.

If you desire to sell stock, there is nothing to prevent you from soliciting orders on your own account, and you can sell at prices that will remunerate you, according to your zeal and energy.

Should you purchase trees at wholesale to sell again, we have no objection to your saying that your trees (as much as are purchased of us) are from our nurseries, but in no case can other stock be represented as our growing. Our trees and plants are guaranteed true to name to the purchaser only, after which our control ceases; hence our responsibility also.

NOTE CAREFULLY BEFORE ORDERING

The Terms and Conditions of Sale

1. **TERMS**—The prices in this list are under the following conditions, and for CASH WITH ORDER. Sales, however, to known, responsible, prompt-paying customers we will book during shipping season, and forward orders to be paid for promptly on receipt of invoice. Parties unknown, or with whom we have had no business transactions will please send cash or satisfactory security with their orders. Stock ordered booked in advance of shipping season, to be reserved, must be accompanied with remittance of AT LEAST ONE-THIRD OF THE LIST PRICE; balance to be paid when shipping season arrives. Orders so booked, we will name list of stock reserved, and such will be held subject to agreement, unavoidable accidents excepted. When such accidents have occurred notice will be promptly given, stating nature of loss or damage. Orders given for future shipment, without earnest money accompanying same, will only be entered subject to stock ordered being on hand when shipping time arrives.

2. **TELEGRAPH ORDERS**, to receive prompt attention, when from unknown parties, must place sufficient deposit subject to our order, with Bank or Express Agent, and note same in message.

3. **GOODS SENT C. O. D.** when half the amount is sent us or deposited with Bank or Express Agent. When deposited it must be certified and certificate sent with order.

4. **REMITTANCE AT OUR RISK**, if made by Postal Money Order on Sarcoxie, Mo., or money by Express prepaid or draft on New York, St. Louis or Chicago. Drafts or checks on other points must be drawn with exchange; otherwise we will not accept them at par. Drafts and money orders should be made payable to JAMES B. WILD & BROS.

5. **ANY REMITTANCE IN EXCESS** of invoice will be promptly returned, or held subject to order.

6. **ORDERS AND CONDITIONS OF SALE**.—At prices in this list, not less than 5, 10, 50, 100, 500 or 1,000 of a sort and size of a class will be furnished at the respective 5, 10, 50, 100 or 500 rate, except when a class is offered in assortment, then 10 or more of a sort in that class may be selected in making up the 100 or 500 of that class to secure the 100 or 500 rate on same. Less than 10 of a sort will be charged ten cents to the proportion of the 10 rate. For example: When the 10 rate is \$1 for 10, 5 will be furnished for 60 cents, or 1 for 20 cents. Further, prices herein quoted are for your selection of sorts at respective prices given, but we reserve the right to fill in a smaller or larger size (or age) than ordered, should we be out of the size or age of sorts wanted, charging therefor at the respective size or age of sorts used in filling the order. Parties ordering should state preference of a larger or smaller grade, so that we can be governed accordingly. Uniform grades cannot be guaranteed when sorts ordered are to be strictly adhered to. Orders joined with needed specifications not quoted or agreed to in this price list will not be entertained, except by special agreement in writing. When sorts are ordered that we do not offer in this list, we will exercise our judgment and send as nearly similar sorts as we have at command.

7. **GRADES**.—Size, height—or caliper measurements—are taken from the collar near the root, and are stated for guidance only. Slight variations may sometimes occur. Reasonable customers will understand that it is not calculated to mean

measurement of each plant or tree. If any items in sizes, ages or height requested are sold out, then the most available will be observed as filling the desired place, unless prohibited in the order given.

8. SAMPLES, when ordered, will be invoiced at list rates, but subject to a rebate to equal prices given on order placed through same.

9. BOXING, BALING AND PACKING—Prices herein do not include same. A moderate charge will be made for such, but no charge for delivering to railroad depot or express office here. We charge for boxes (which includes packing) as follows:

12x12 inches by 8 ft. \$1 10	20x20 inches by 9 ft. 2 05	28x28 inches by 10 ft. 2 95
12x12 inches by 9 ft. 1 20	20x20 inches by 10 ft. 2 25	30x30 inches by 8 ft. 2 80
12x12 inches by 10 ft. 1 25	22x22 inches by 8 ft. 2 00	30x30 inches by 9 ft. 3 00
14x14 inches by 8 ft. 1 40	22x22 inches by 9 ft. 2 20	30x30 inches by 10 ft. 3 50
14x14 inches by 9 ft. 1 40	22x22 inches by 10 ft. 2 55	32x32 inches by 8 ft. 3 00
14x14 inches by 10 ft. 1 80	24x24 inches by 8 ft. 2 20	32x32 inches by 9 ft. 3 25
16x16 inches by 8 ft. 1 60	24x24 inches by 9 ft. 2 45	32x32 inches by 10 ft. 3 40
16x16 inches by 9 ft. 1 75	24x24 inches by 10 ft. 2 55	34x34 inches by 8 ft. 3 20
16x16 inches by 10 ft. 1 95	26x26 inches by 8 ft. 2 35	34x34 inches by 9 ft. 3 50
18x18 inches by 8 ft. 1 75	26x26 inches by 9 ft. 2 55	34x34 inches by 10 ft. 3 75
18x18 inches by 9 ft. 1 90	26x26 inches by 10 ft. 2 75	36x36 inches by 8 ft. 3 40
18x18 inches by 10 ft. 2 10	28x28 inches by 8 ft. 2 55	36x36 inches by 9 ft. 3 45
20x20 inches by 8 ft. 1 85	28x28 inches by 9 ft. 2 75	36x36 inches by 10 ft. 4 00

And in proportion for larger or smaller boxes. Bales from 10 cents to \$3 each. Boxes ordered paper lined or double lined and filled with sawdust, will be extra cost. Packing of car load lots in bulk with ordinary straw or hay packing, from \$5 to \$8 per car; where special material, as moss, and extra packing is ordered, the same will be at additional cost of material and labor required.

10. TRANSPORTATION.—Our responsibility ceases on the shipment of goods in good order, and transmittal of Bill of Lading to consignee; and payment of bill is in no instances to be subject to arrival or non-arrival of goods at destination, though we will at any and all times use our utmost endeavors to trace up any missing goods.

NOTE: In order to secure third class freight rates under ruling of the "Western Classification," on Nursery stock, boxed (not baled), shipper must release to value of \$5.00 per cwt., and in order that our patrons may have the benefit of the lower freight rates, we will release and guarantee freight charges through for them, unless instructed on order not to do so. Freight charges not guaranteed must be prepaid, or forwarders will not accept goods for shipment.

11. RECLAMATION.—Claims for deduction from whatever cause **MUST BE MADE IMMEDIATELY ON RECEIPT OF GOODS**. No shortage claim entertained unless itemized list of all stock as found is promptly submitted to us. Check on goods when you unpack, and then and there note carefully on a memoranda, itemized as to sort, size labeled, with number of bunches and number in each bunch received, thereby giving a detailed report of stock as found. Don't state so and so was short, without stating also what you did get. Remember we, too, want to know what you base your claims upon, and must have facts, as you may be over on some items, or mistook one sort for another, or you may have intended to order such and such, or more of some, but failed to note same on order as sent in. Further, in case of damaged stock and where you have just reason to believe that fault rests with us for its condition—under such conditions we here request that such stock be immediately taken proper care of, so that no further damage may result; **AND AT ONCE NOTIFY US OF THE FACTS**, so that we may have opportunity to direct its disposition. **Claims WILL NOT BE ENTERTAINED** after original bundles or packages are broken and part of said goods used or disposed of and claim set up afterwards, to seek reductions on same. Your failure to do so must exempt us from further responsibility in the matter. Adjustments are easy while all the details are fresh in mind, but we cannot be blamed for declining claims upon complaints made weeks afterward.

12. INSURANCE.—At the prices in this list we do not guarantee stock to live, nor absolutely free from insect pests or disease common to respective line of stock offered; nor will we replace free of cost that which dies or fails to grow—nor can we, in view of the various incidents that it is subject to, as the success or failure depend largely upon climatic conditions, manner of planting, after-care, etc. Having been in the nursery business for over twenty-nine years at Sarcoxie, and our business having increased with wonderful rapidity, now covering many hundred acres in a body devoted to the Nursery proper, is sufficient evidence that we are up with the times and have won the confidence of the patronizing public, and number among our patrons the leading nurseries of the United States, Canada and Mexico. When a guarantee is wanted, exceptional to these terms, then the prices will necessarily be based on the nature of risks to be assumed.

Certificate of Inspection will be Furnished with Each Shipment

13. FUMIGATION OF STOCK—Same will be done when requested to do so, or where a state to which the stock is to be shipped makes it compulsory to do so.

Formula to be used will be such as may be recommended by state or states; but it must be understood that we will assume NO RESPONSIBILITY for result, when we have carried out such instructions.

14. **GUARANTEE OF GENUINENESS**—While we exercise our greatest diligence and care to have all our trees, etc., true to label, and hold ourselves in readiness, on proper proof, to replace all trees, etc., that may prove untrue to label free of charge, or refund amount paid, it is mutually understood and agreed to between the purchaser and ourselves that our guarantee of genuineness shall in no case make us liable for any sum greater than that originally received for said trees, etc., that shall prove untrue.

JAMES B. WILD & BROS. Sarcoux, Jasper County, Missouri.
James B. Wild, Henry N. Wild, Frank H. Wild.

15. **POSITIVELY NO DEVIATION** from the foregoing terms, unless made by special agreement in writing, setting forth in specific terms, where at variance to the foregoing.

16. The publication of this list abrogates previous quotations.

Give Plain Directions for Shipping

Don't forget to write postoffice address plainly, also freight or express, if different from postoffice. Purchasers will confer a favor by stating the manner in which they wish their goods sent—freight or express—also route. When none are designated, we forward to the best of our judgment; but in no case do we assume and responsibility after the packages are shipped.

PROMPT SHIPMENTS—To meet this want we have adapted our packing house to every convenience for the rapid and thorough dispatching of orders.

WEIGHT OF TREES PACKED can only be given approximately; 1,000 trees packed for shipment, ordinary weight—1 to 2 feet, 150 to 200 lbs.; 2 to 3 feet, 300 to 400 lbs.; 3 to 4 feet, 500 to 650 lbs.; 4 to 5 feet, 900 to 1,200 lbs.; 5 to 6 feet, 1,500 to 2,000 lbs.; 6 to 7 feet, three year old, 2,500 to 3,500 lbs.; 7 to 8 feet, 3,000 to 4,000 lbs. Evergreens weigh more.

A CAR LOAD WILL HOLD, when packed in bulk in box cars, from ten to twelve thousand 5 to 6 foot trees; from fourteen to sixteen thousand 4 to 5 foot trees, and from six to eight thousand 6 to 8 foot trees, and from one-fourth to one-third more when boxed.

Coal or flat cars boxed up will hold about double the quantity of ordinary cars. Cost of boxing up a coal car is about \$30.00 per car.

To arrive at the appropriate cost for boxing or baling we submit the following:

On 6 to 8 foot trees..	\$9.00 to \$12.00 per 1000	\$2.50 to \$3.00 per 100	50c to 60c per 10
On 5 to 6 foot trees..	1.00 to 3.00 per 1000	1.50 to 2.00 per 100	30c to 40c per 10
On 4 to 5 foot trees..	5.00 to 7.00 per 1000	.90 to 1.25 per 100	20c to 25c per 10
On 3 to 4 foot trees..	3.00 to 5.00 per 1000	.50 to .75 per 100	15c to 20c per 10
On 2 to 3 foot trees..	1.50 to 3.00 per 1000	.25 to .50 per 100	15c per 10
On 1 to 2 foot trees..	.75 to 1.50 per 1000	.20 to .25 per 100	10c per 10
Plants, 6 to 7 inches..	.30 to .50 per 1000	.10 per 100	10c per 10
Vines & Stw. plants.	.30 to .50 per 1000	.10 per 100	10c per 10

The approximate cost for boxing and baling transplanted Evergreens:

On 6 to 8 foot trees..	\$6.00 to \$7.00 per 1000	\$6.00 to \$7.00 per 100	\$1.00 to \$2.00 per 10
On 4 to 5 foot trees..	30.00 to 60.00 per 1000	3.00 to 6.00 per 100	.75 to 1.50 per 10
On 3 to 4 foot trees..	10.00 to 30.00 per 1000	2.00 to 3.00 per 100	.50 to .75 per 10
On 2 to 3 foot trees..	7.00 to 9.00 per 1000	1.50 to 2.00 per 100	.30 to .50 per 10
On 1 to 2 foot trees..	3.00 to 5.00 per 1000	.50 to .75 per 100	.20 to .30 per 10
On 8 to 12 in. trees..	.75 to 1.50 per 1000	.20 to .30 per 100	10 to per 12

Seedling Evergreens—

On 6 to 8 inch trees..	.50 to .75 per 1000	.10 to .15 per 100	.10 per 1

No package put up for less than 10 cents.

Rules for Ascertaining the Number of Plants Required for One Acre Ground, which Contains 43,560 Square Feet

Multiply the distance in feet between the rows by the distance the plants are apart in the row, and their product will be the number of square feet for each plant or hill, which divided into the number of feet in an acre, will show how many plants or hills the acre will contain, thus:

Blackberries	3 feet by 3 ft 24	43,560	1,315 plants
Raspberries	7 feet by 3—21	43,560	2,074 plants
Strawberries (for field culture)	4 feet by 2—8	43,560	5,445 plants
Strawberries	3 feet by 16 in 4	43,560	10,890 plants
Dwarf Pears	10 feet by 10 ft 100	43,560	435 trees
Peaches	18 feet by 18—324	43,560	134 trees
Standard Pears and Cherries	20 feet by 20—400	43,560	108 trees
Apples	30 feet by 30—900	43,560	48 trees

Dewberry—Lucretia

	Each.	Per 5	Per 10	Per 50	Per 100	Per 500	Per 1000
Dewberry, Lucretia (plants)\$.10	\$.15	\$.25	\$.60	\$ 1.00	\$ 3.50	\$ 6.00

NOTE—The Lucretia Dewberry plants we offer are pure stock—the best; ripens here before Early Harvest Blackberry; and so far as quality and kind of fruit are concerned none of the above list of Blackberries can surpass it.

STRAWBERRIES

This is the most popular of small fruits. No fruit is so free from objectionable features as the strawberry. No thorns, no briars, easy of culture, easy to gather, and the most refreshing of all fruits, coming in before any other. Set plants in rows four feet apart and one foot apart in the rows. Cultivate well, and by fall the plants will have matted the ground well over. Mulch lightly in winter, to prevent plants from heaving.

We endeavor to handle our plants in the very best manner. They are carefully cleaned, the roots straightened and neatly tied in bunches of fifty each, labeled and packed in paper and mossed.

Order strawberry plants early in spring by all means; as early as possible if to be shipped as freight; small lots or late in season must be sent by express. Let us book your orders while stock is full, and then have them shipped so as to reach you at least a few days before they are wanted.

All varieties marked "p" are pistillate, (flowers without stamens), imperfect in

blossom, and need at least every fourth row to be planted with some perfect or staminate sort, which need marked (S) to select from.

We can supply strawberry plants in the fall after October 20th, during November and in the spring at 10, 100 and 1,000 rates. No plants furnished at 1,000 rate in the fall, until after October 1st. The prices herein named are layer plants.

Number of plants required to set one acre for field culture:

Distance.	Plants.
4 by 1 foot	10,890
4 by 2 feet	5,445
4 by 3 feet	3,630

Twelve Strawberry plants will be mailed for 10c additional to 10 rates of respective variety; at the 100 rate, add 25 cents per 100 to cover postage, packing, etc.

Send for special prices for large quantities of Strawberry plants.

(For delivery after October 20th, only).

NOTE: Varieties marked (p) are pistillate; varieties marked (s) are staminate.

Evergreens

NOTE: All Evergreens offered are of our own growing, from seeds and cuttings. Do not compare our rates with "forest pulled seedlings," nor with Northern nursery grown, so-called; but note that those we offer can be had long before you can get them from the north. Aside from this, ours are acclimated to the West and South, which gives them a decided advantage over others for timber plantations, windbreaks and ornamental planting.

All here listed are transplanted and root-pruned. For seedlings see pages 29 and 30.

Selected specimens 25 per cent higher; extra selected specimens 50 per cent higher than the list price.

Roses

NOTE—The Roses we here offer are grown in open ground, and must not be confounded with pot plants. All offered are strong plants, suitable for general planting, also for conservatories, cemeteries, etc. Size of plants according to class will average from 10 to 20 inches in height. Climbing Roses will be cut back to about fifteen inches cane.

Caroline Marniesse, a grand cemetery rose25	.85	1.50	6.00	9.00

Above is a hardy rose always in bloom. As a bedding Rose it has no superior. It is literally a continuous bloomer, being constantly covered with flowers the entire summer. The blossoms are of medium size, full and double, and borne in very pretty clusters. Color pure white, slightly tinged with pink, with delightful tea fragrance. The bush is low growing, and especially adapted for a border or cemetery planting. It is entirely hardy having withstood unprotected a temperature of 18 degrees below zero without the least injury.

Norway Spruce, 14 ft and over in height	3.00		
Norway Spruce, 15 ft and over in height	3.50		
Norway Spruce, from 16 to 20 feet in height, from	\$4.00 to	12.00 each	
Ivy Leaves (1,000 for \$2.50)			

Evergreen Boughs in assortment from above named species of trees, 12 to 15 inches, \$1.25 per 100 pounds; 1,000 pounds for \$10.00. Norway Spruce, \$1.50 per 100 pounds; 1,000 pounds for \$12.50. Holly boughs, 12 to 15 inches, \$5.00 per 100 pounds.

Apple Root Grafts

Root grafts are cions and roots grafted and tied or bound together, and are thus ready for planting in permanent nursery rows.

Orders for root grafts given without special agreed specifications will be put up in same manner as those we put up for our own planting. Length of grafts 6 to 7 inches, which includes Root and Cion. Not less than 100 of a variety

Read Terms and Conditions of Sale Before Ordering.

will be put up in the general assortment of varieties. Smaller or broken lots, as to varieties, or of new and scarcer kinds, will be priced on application.

Grafts weigh from 15 to 40 pounds per 1000 packed. All orders put up at our risk of damage in storage up to March 1st. After that date same will be at purchaser's risk.

PRICES OF VARIOUS STYLES APPLE ROOT GRAFTS OFFERED.

Special prices will be given when in want of large quantities; give list with number wanted in each sort, and the style.

Style 3.—Graft worked on No. 1, 3-16 up caliper stock, using first and second cut of a seedling, with from four to 5 inches to a cut, and about 5-inch cion. Such grafts are termed by many nurserymen **WHOLE ROOT GRAFTS**. Price of 100 grafts of a sort, 60 cents. If worked on No. 2 stock 45c per 100.

Style 4.—Graft worked on what is termed **WHOLE STOCK**, using No. 1, 3-16 up caliper seedling and about 5-inch cion. Price of 100 grafts of a sort, 90 cents. If worked on No. 2 stock, 75 cents per 100.

Style 5.—Graft worked on No. 1, 3-16 up caliper stock, using first 5-inch of a seedling and 5-inch cion. This style of graft is termed **COLLAR OR CROWN GRAFTS**. Price per 100 grafts of a sort, 70c. If worked on No. 2 stock, 55c per 100.

Style 6.—Grafts worked on No. 1, 3-16 up caliper stock, using all of such seedlings, usually making about three cuts of three inches each, and with about 5-inch cion. Such grafts are termed **PIECE ROOT GRAFTS**. Price per 100 of a sort, 30 cents. If worked on No. 2 stock, 35 cents per 100.

Style 8.—Graft worked on No. 1 3-16 caliper stock, using about 2 inch of seedling, (using up the entire stock), and about 8 inch cion. This graft we recommend as a most suitable one to grow the tree mainly upon its own roots, and the least subject to suckers sprouting up from the seedling. Price per 100 grafts of a sort, 55 cents; if worked on No. 2 stocks, 40 cents per 100.

Style 11.—Graft worked on No. 1, 3-16 up caliper stock, using only second cut and same to be about 5 inches, with 5-inch cion. Such grafts are termed **SECOND-CUT GRAFTS**, and are, in our estimation, the best grafts that can be secured from a seedling stock. Price per 100 grafts of a sort, 80 cents; if worked on No. 2 stock, 65 cents per 100.

Figure 1 in above cut represents a bunch of Cions.

Figure 7 in above cut represents a bunch of No. 1 Apple Seedlings.

Figure 10 in above cut represents a bunch of No. 2 Apple Seedlings, branched roots.

THOMAS' AMERICAN FRUIT CULTURIST

Containing practical directions for the propagation and culture of fruits adapted to the United States. Twenty-first edition, thoroughly revised, greatly enlarged, up-to-date. A very handsome volume of over 800 pages, profusely illustrated with over 800 figures and engravings. Bound in English muslin.

Price, by mail, postage free to all parts of United States, \$5.00.

This book has long been the most practically useful one upon the fruits of the United States, and is today the only one in the English language which is up-to-date, all others being from ten to twenty years old. In this edition entirely new chapters have been added upon Insects and Diseases. "The Spraying of Fruits," by Prof. Bailey; on Agricultural Experiment Stations; on Wild Fruits, on Nuts, on the Citrus Fruits and Other Sub-Tropical Fruits, the Persimmon, etc., by Mr. Hart. Prof. Budd has added descriptions and figures of new Russian Apples, while hundreds of new varieties of Apples, Cherries, Grapes, Peaches, Pears, Plums and the Bush Fruits have been described and figured.

All figures of fruits are drawn to a scale, so as to give a correct idea of size.

NOTE—Orders for Thomas' American Fruit Culturist will be sent to publishers to be filled, as we do not keep the books in stock.
